

I am an Indiana citizen and wish to speak out again the proceeding 02-278. I am extremely satisfied with our current State's Do Not Call Law and know that the effectiveness of this law will be diminished with preemption from the federal law. I know that my feelings on this matter are equal to other citizens in Indiana. Solicitation calls to my home are unwanted and I have a right as a citizen of the United States of America and the State of Indiana to keep it that way. Too many times big corporations get away with invasions of individual's rights. Therefore, I do not want our law preempted.
